

Bed base CF09.  
Patent protected

= ELLA & LOUIS

**TECHNICAL INFORMATION**

Self-supporting transforming system with foldaway double bed and integrated sofa which, when opened, can be divided with a sliding movement into two single beds that can be separated from one another. One of the two beds, either the right or left one as required, remains fixed while the other slides sideways. The double bed is turned into two single beds with reclining padded headboards, just as the sofa becomes two armchairs by sliding them on a rail running along the floor and anchored to the wall. The system is equipped with a release device to divide the two beds and to adjust height differences.

Opening the bed, the seat of the sofa automatically slides forward and the backrests fold away.

The system can be completed, on the fixed side part, with modular elements from the Living & Young System, replacing the standard 1135 mm depth armrest with a shorter 785 mm depth armrest.

- Iron Bed frame with adjustable feet.
- Bed base with curved beech plywood slats mounted to the frame with adjustable nylon/rubber gaskets.
- weight of single bed base: Kg 33
- weight of single bed base + front panel Kg 45
- Sofa W mm 2164 with armrest
- Standard armrest mm W 140 x D 1135
- Short armrest mm W 140 x D 785
- Standard mattresses H 180 mm, 850 mm x 1970 mm, weight 14-16 kg.
